01. BRAND FOUNDATION

The non-negotiable meaning behind The Window Valet.

Brand Manifesto

We believe every home and business deserves more than a window covering—it deserves a thoughtfully designed solution. We begin with people, not products. We manufacture many of our own premium products locally while carefully selecting the finest products from respected manufacturers when they provide the best solution. Our loyalty belongs to the customer, not to a catalog or a single manufacturer.

Mission

To design, craft, curate and install custom window treatment solutions that enhance the beauty, comfort and functionality of every space while delivering an exceptional customer experience.

Vision

To become the most trusted custom window treatment company in the Midwest by combining innovative products, expert craftsmanship and unmatched customer service.

Core Values

- Customer First
- Craftsmanship
- Integrity
- Innovation
- Relationships

Brand Promise

Custom Crafted. Carefully Curated.

02. POSITIONING AND CUSTOMER PROFILES

Who we serve, how we position the company, and why customers choose us.

Brand Position

The Window Valet creates beautifully designed interior and outdoor living environments through custom-crafted products, carefully curated premium brands and exceptional customer experiences.

Our Philosophy

We are not loyal to products. We are loyal to people. If we manufacture it, it is because we believe we can produce an exceptional solution. If we source it, it is because another manufacturer has the ideal solution. Every recommendation reflects our commitment to craftsmanship, integrity and customer satisfaction.

Customer Profiles

Audience	Primary need	Brand response
Luxury Homeowners	Design, quality, motorization, continuity	Refined, design-focused, confident
Growing Families	Beauty, privacy, durability, ease	Helpful, practical, premium but approachable
Interior Designers	Respect for design intent and client relationship	Collaborative and professional
Builders	Reliable process, schedule and execution	Operationally sharp and easy to work with
Commercial Clients	Durability, scope clarity and accountability	Professional, disciplined and solution-driven

03. BRAND VOICE AND MESSAGING

How The Window Valet should sound everywhere.

Brand Personality

Professional • Knowledgeable • Trustworthy • Creative • Design-focused • Innovative • Friendly • Confident

Brand Voice

We educate. We simplify. We inspire. We never pressure. We speak with confidence because expertise creates trust.

Five Brand Pillars

1. Custom Crafted
2. Carefully Curated
3. Inspired Design
4. Outdoor Shade Solutions
5. Exceptional Experience

Messaging Rules

- Lead with the customer outcome, not a product list.
- Explain options simply and confidently.
- Use premium language without sounding exclusive or pretentious.
- Reinforce local craftsmanship and curated choice only when accurate.
- Avoid bargain-bin, gimmicky, high-pressure or manufacturer-first messaging.

04. LOGO SYSTEM

The new master signature is the primary public-facing identity.

Mark	Role	Best use
Master Brand Signature	Primary corporate identity	Website, brochures, proposals, signage, trade shows, major advertising
Secondary Lockup	Simplified brand signature	Smaller layouts and applications where the full descriptor is unnecessary
WV Icon	Premium shorthand	Social icons, apparel, product labels and compact applications
Heritage Mark	Valet character + wordmark	Selective community, heritage and personality-driven uses

Rule: The official logo must never be recreated from typed text. Use approved artwork only.

05. LOGO CLEAR SPACE, SIZING AND MISUSE

Protect the master signature and keep it readable.

Clear Space

Maintain clear space around the logo equal to at least the height of the “T” in “THE.” No text, graphics, photos or trim edges should crowd this area.

Minimum Size Guidance

Application	Minimum / guidance
Business card/ small print	Use only when the complete signature remains fully legible; otherwise use an approved simplified lockup.
Embroidery	Use simplified mark when small details cannot reproduce cleanly.
Website header	Size for clear readability on desktop and mobile; SVG preferred.
Yard sign / banner	Logo and descriptor must be readable at intended viewing distance.
Building signage	Vector artwork only; scale by sight line and viewing distance.

Never

- Stretch, squeeze, rotate, skew, outline, bevel or add shadows.
- Recolor the logo outside approved brand colors.
- Separate or rearrange master-signature elements without an approved lockup.
- Use a screenshot, website image or low-resolution social file for production.
- Mix the retired “Shutters • Shades • Automation” signature with the new master brand system.

06. COLOR STANDARDS

Use the Brand Book Version 3.0 palette across all new work.

Color	HEX	RGB	CMYK target	Primary use
Window Valet Red	#C12026	193, 32, 38	0, 95, 80, 24	Primary logo, key headlines, accents
Warm Charcoal	#5A5A5A	90, 90, 90	Vendor verify	Brand promise, secondary copy
Architectural Black	#141414	20, 20, 20	Vendor verify	Descriptor, body copy, signage
Soft White	#F8F8F8	248, 248, 248	Vendor verify	Preferred background

Production note

The former #E72C33 red is retired for new brand production. Final Pantone, vinyl, paint and embroidery thread matches should be confirmed by the production vendor against the approved master vector artwork and a physical proof when color is critical.

07. TYPOGRAPHY STANDARDS

Consistent typography should feel modern, architectural and premium.

Use	Preferred direction	Rule
Logo	Approved artwork only	Never typeset or recreate the logo.
Primary headlines	Modern geometric sans-serif	Bold, clean and confident.
Body copy	Clean humanist sans-serif	Regular weight with generous spacing.
Subheads / labels	One of the two approved families	Use weight and size for hierarchy, not extra fonts.
Exterior lettering	Bold, highly legible sans-serif	Readability at distance takes priority.

- Use only two font families across brand media.
- Headlines may be bold; body copy should remain clean and readable.
- Avoid script, novelty, distressed or playful fonts for primary branding.
- Keep capitalization and tracking consistent within each application.

08. PHOTOGRAPHY AND IMAGE STYLE

Make customers picture the finished environment and the experience.

Approved Photography

- Use real Window Valet projects whenever possible.
- Show natural light, premium homes and well-composed commercial spaces.
- Prioritize Studio B, designer drapery, motorized shades and outdoor living.
- Include installers at work when the image demonstrates craftsmanship and professionalism.
- Use happy clients selectively and naturally.
- Keep vertical lines straight, rooms clean and product color accurate.

Avoid

- Obvious stock photography when authentic project photography exists.
- Dark, grainy, crooked, cluttered or heavily filtered images.
- Product collages that make the brand feel like a catalog.
- Visible tools, trash, cords, fingerprints or packaging unless intentionally educational.

09. GRAPHIC STYLE AND LAYOUT

Clean, premium and easy to scan.

- Use generous white space; do not fill every inch.
- Lead with the master signature or a strong benefit headline, not competing elements.
- Use Window Valet Red selectively for hierarchy and calls to action.
- Use Architectural Black for primary body copy and Warm Charcoal for secondary messaging.
- Use thin dividers, simple single-color icons and consistent alignment.
- Lifestyle imagery should dominate over product grids when photography is used.
- Keep one clear call to action on advertising and sales pieces.

Preferred Hierarchy

1. Brand or benefit headline
2. Supporting promise or explanation
3. Relevant proof point
4. Single call to action

10. PRODUCT AND SERVICE HIERARCHY

The descriptor is the primary service architecture.

Master Descriptor

CUSTOM WINDOW TREATMENTS • DESIGNER DRAPERY • OUTDOOR SHADE SOLUTIONS

Use the descriptor exactly as shown in the master signature when space allows. It replaces the retired “Shutters • Shades • Automation” line.

Category Guidance

Category	Includes / supports
Custom Window Treatments	Blinds, shades, shutters, motorization and related interior solutions
Designer Drapery	Custom drapery and elevated soft-treatment design
Outdoor Shade Solutions	Exterior motorized screens, awnings and related outdoor shade products
Commercial Solutions	Use as a market/application descriptor when the audience requires it

Product-level copy may name specific products for clarity, SEO or sales needs, but the master brand should remain organized around the three descriptor categories above.

11. BUILDING SIGNAGE STANDARDS

Use the new master brand hierarchy on Studio 1417 and future locations.

Element	Standard
Company identity	Use approved red master wordmark / signature.
Brand promise	Warm Charcoal when included: Custom Crafted. Carefully Curated.
Descriptor	Architectural Black: Custom Window Treatments • Designer Drapery • Outdoor Shade Solutions.
Material	Dimensional PVC, acrylic or painted aluminum; matte/satin preferred.
Mounting	Permanent exterior signs should be mechanically fastened.
Artwork	Vector artwork only; no raster recreation.

For architectural lettering where the full master signature is not practical, use an approved simplified lockup. Do not substitute the retired service list as the primary brand message.

12. VEHICLE GRAPHICS STANDARDS

Every vehicle should present the same master brand.

- Use the master signature consistently across the fleet.
- Place a large logo on both sides where it is immediately visible.
- Place website and phone on the rear; keep them readable from traffic distance.
- Keep copy minimal. Do not turn the vehicle into a product catalog.
- Feature one strong lifestyle image rather than multiple small product photos when imagery is used.
- Use vector logo files only. Vehicle photography should be 100–150 DPI at final size.
- Use the master descriptor when a service explanation is needed.

Preferred descriptor

Custom Window Treatments • Designer Drapery • Outdoor Shade Solutions

13. PRINT STANDARDS

Business cards, brochures, folders, magazine ads, banners and yard signs.

Item	Minimum standard
Business cards	300 DPI, CMYK, bleed, vector logo
Brochures/ folders	300 DPI, CMYK, vector logo, proof before print
Magazine ads	300 DPI press-ready PDF with embedded fonts
Yard signs	Vector logo; 150–300 DPI imagery depending on size
Banners	Vector logo; 100–150 DPI imagery at final size
Presentation materials	Consistent master signature, colors and typography

Copy standard

Lead with the promise or customer benefit, explain simply, and give one clear call to action. Use the descriptor when the audience may not immediately know what The Window Valet does.

14. DIGITAL AND SOCIAL STANDARDS

Website, Google, email, social media and video.

- Use SVG for the logo on websites whenever possible; PNG only when SVG is not supported.
- Use the WV icon or an approved simplified mark for small social profile images.
- Maintain the brand hierarchy: promise first, descriptor second when needed.
- Use authentic project photography and educational messaging.
- All email signatures should use a consistent logo, title, phone and website format.
- Do not use tiny master-signature details where they become unreadable.

Channel	Style direction
Website	Premium, design-focused, educational, strong scheduling CTA
Google Ads	Clear customer need + local expertise + direct CTA
Facebook / Instagram	Projects, before/after, education, Studio B, local personality
YouTube / video	Practical, educational, project-focused
Email	Helpful, brief, professional and confident

15. APPAREL AND PROMOTIONAL PRODUCTS

Uniforms should look like a premium service brand.

- Preferred apparel colors: black, charcoal, white, gray, with controlled red accents.
- Use embroidered logo or high-quality screen print; no low-resolution heat transfers.
- For polos and jackets, use a simplified approved logo or wordmark when the full signature is too detailed.
- For hats, use the WV icon or another approved compact mark.
- Installer apparel should be clean, consistent and field-ready.
- Promotional products should favor simple brand marks over crowded service copy.

Item	Recommended mark
Polo	Simplified approved logo / wordmark
Hat	WV icon
Jacket	Wordmark or simplified lockup
Installer shirt	Simplified logo; website/phone optional on back
Premium customer gift	WV icon or clean wordmark

16. ADVERTISING STANDARDS

Every ad should communicate one clear idea.

Ad Formula

1. Strong headline: the customer benefit or design outcome.
2. Supporting line: why The Window Valet is the answer.
3. Proof point: craftsmanship, curated brands, local manufacturing, design expertise, motorization or exceptional service.
4. Call to action: schedule, call, text or request an estimate.

Approved Messaging Examples

- Custom Crafted. Carefully Curated.
- Beautifully designed window treatments. Expertly crafted and installed.
- Designer drapery, custom window treatments and outdoor shade solutions—all from one trusted local team.
- We manufacture when it creates the best solution. We source when another premium manufacturer does. Our loyalty is to the customer.

Avoid ads that try to say everything. One strong promise wins.

17. BRAND ARCHITECTURE

Sub-brands and heritage assets support the master brand.

Brand/ mark	Role	Use
The Window Valet	Master company brand	All corporate and customer-facing service materials
Master Brand Signature	Primary visual identity	Marketing, website, signage, proposals, trade shows
Valet Character	Heritage personality asset	Selective community, heritage and friendly marketing
WVIcon	Premium shorthand	Apparel, social icons, product labels, compact applications
WVShades	Private-label product identity	Shade manufacturing, product literature and trade/product contexts
Studio B	Immersive luxury design center	Experience marketing, events, design consultations and content

Rule: Sub-brands and experience brands support The Window Valet and should not visually overpower the parent brand unless the piece is specifically product-label, trade-facing or Studio B-specific.

18. VENDOR PRODUCTION SPECIFICATIONS

What every designer, printer, sign shop and wrap company must receive.

Required Vendor Package

- Approved master logo files: AI, EPS, SVG and print PDF.
- Approved PNG only for digital or office use.
- Current Brand Standards Manual and Brand Book.
- Approved color values and physical swatch when color is critical.
- Written approval for any logo alteration, color substitution or layout deviation.

Vendor Rules

- No screenshots or logos pulled from the website.
- No recreated logos from typed fonts.
- No unapproved color matching by eye.
- No stretching or rearranging logo elements to make them fit.
- Proofs must be reviewed before production.

19. RESOLUTION AND FILE REQUIREMENTS

Quality-control requirements for every production channel.

Use case	Minimum requirement	Preferred file
Master logo	Vector only	AI, EPS, SVG, PDF
Business cards / brochures	300 DPI at final size	PDF with vector logo
Magazine ads	300 DPI, CMYK, embedded fonts	Press-ready PDF
Yard signs	150–300 DPI imagery; vector logo	PDF / AI
Banners	100–150 DPI at final size; vector logo	PDF / AI
Vehicle wraps	100–150 DPI full-size images; vector logo	AI / PDF + linked images
Building signs	Vector only	AI / EPS / SVG / PDF
Billboards	30–75 DPI imagery by viewing distance; vector logo	Vendor-specific PDF
Web	SVG logo; optimized images	SVG / PNG / WebP
Social	Platform size; high-res raster	PNG / JPG

Simple rule: if it is a logo, it should be vector. If it is a photo, it must have sufficient resolution at the final printed size.

20. APPROVAL PROCESS

Keep the brand from drifting one vendor at a time.

Review is required before release when a piece includes:

- Logo or color usage
- Vehicle graphics
- Building signage
- Magazine or print advertising
- Apparel or embroidery
- Yard signs and banners
- Major website or social campaign assets

Approval Checklist

- Current master logo is used and not distorted.
- Window Valet Red is #C12026 for new work.
- Promise and descriptor follow the current brand hierarchy.
- Typography is limited to the approved two-family direction.
- File resolution is correct for final size.
- Phone, website and call to action are accurate.
- Final proof has been reviewed at actual size when practical.

21. QUICK REFERENCE CHECKLIST

Use this page as the production checkpoint.

Category	Current standard
Master signature	New valet character + red wordmark + promise + three-part descriptor
Brand promise	Custom Crafted. Carefully Curated.
Descriptor	Custom Window Treatments • Designer Drapery • Outdoor Shade Solutions
Red	#C12026
Warm Charcoal	#5A5A5A
Architectural Black	#141414
Background	#F8F8F8
Logo files	AI, EPS, SVG or vector PDF
Typography	Two font families; geometric headline + humanist body
Photography	Real projects, natural light, premium environments
Voice	Professional, knowledgeable, trustworthy, creative, design-focused, innovative, friendly, confident
Print	300 DPI standard print; vector logo
Large format	Vector logo + 100–150 DPI imagery at final size

When in doubt: protect the master signature, keep the layout clean, and reinforce Custom Crafted. Carefully Curated.

22. SOURCES REVIEWED AND VERSION NOTES

Version 2.0 supersedes the old manual where the documents conflict.

Sources reviewed

- The Window Valet Brand Book Version 3.0 Final.
- New Master Logo supplied for the current brand signature.
- The Window Valet Brand Standards Manual Version 1.0.

Version 2.0 changes

- Adopts the new master signature and three-part descriptor.
- Replaces the former #E72C33 red with Window Valet Red #C12026.
- Adopts Warm Charcoal #5A5A5A, Architectural Black #141414 and Soft White #F8F8F8.
- Aligns mission, vision, philosophy, customer profiles, personality, voice and five brand pillars to Brand Book Version 3.0.
- Reframes the service hierarchy around Custom Window Treatments, Designer Drapery and Outdoor Shade Solutions.
- Retires the old “Shutters • Shades • Automation” signature from new production.
- Adds Studio B to the brand architecture as the immersive luxury design center.

Review cadence

Review this manual at least twice per year and whenever the master logo, major signage, fleet graphics, Studio B identity or product sub-brands materially change.
